

Narrative describing the excellence, innovation, and heroic efforts of your organization in responding to COVID19 pandemic:

Due to the Covid19 pandemic, Genesee Health System (GHS) Day Program Providers were forced to close temporarily. Mark Weeks, Executive Director of Freedom Works of Genesee County, contacted GHS and inquired about the use of his staff as workers in any group homes who may need them during the pandemic.

Mark communicated to several group home Providers and was able to assist ten of his staff in obtaining temporary work in various homes. Not only did Mark help out his staff, but also supplemented these group homes with already trained and certified direct care workers. GHS appreciates Mark's initiative and innovation during this health crisis.
