

During this COVID-19 pandemic, Monroe CMHA has gone above and beyond during these tough times for the individuals we serve. Every day we strive to provide the best possible care and services to our consumers. We're always seeking to improve and grow. Case management staff have been delivering necessities to the most vulnerable we serve such as toilet paper, medications, and groceries.

Case managers in our child/family department have really stepped up and are helping our teens during this difficult time. With being shut in and not being able to hang with friends. Staff are helping teens that would self-harm to no longer feel the need to hurt themselves. With the transition into homeschooling, teens are developing their own school schedules to follow. Staff are assisting our families with getting food through their school and community and our families haven't reported any significant financial crisis. We are increasing the frequency of contacts to ensure our consumer remain safe.
